

SPECIAL SESSION

 ICACSDF 2026

International Conference on Advances in Cyber Security and Digital Forensics

IEEE Sponsored International Conference with SCOPUS-indexed publication in IEEE Xplore

11 - 12 September 2026 | UPES, Dehradun, India

SPECIAL SESSION

AI, CYBER RISK & PUBLIC SYSTEMS

ABOUT THE SESSION

Public systems encompassing district administration, judiciary, healthcare, energy grids, and public distribution are undergoing rapid AI-driven transformation, yet remain exposed to threats that conventional cybersecurity and digital forensics frameworks were never designed to anticipate. As algorithmic decision-making embeds itself across every layer of governance, the consequences of failure escalate beyond technical disruption: adversarial manipulation, data poisoning, opaque audit trails, and agentic AI failures now threaten not just operational continuity, but the integrity of democratic institutions themselves. The challenge is not merely securing AI; it is ensuring that AI deployed in public life remains transparent, forensically auditable, and answerable to the citizens it serves.

This session convenes researchers, academics, and industry professionals at this critical intersection, advancing rigorous, interdisciplinary frameworks for cybersecurity resilience, digital forensics accountability, and ethical AI governance across the systems that underpin modern public life.

CALL FOR PAPERS

We invite researchers, academicians, and industry professionals to submit original research papers to this special session.

IMPORTANT DATES

Paper Submission Deadline

15 July 2026

Notification of Acceptance: 10 August 2026

Camera Ready Submission: 25 August 2026

Conference Dates: 11 - 12 September 2026

All papers undergo the standard peer-review process. Papers submitted here are counted only for this special session.

TOPICS OF INTEREST (Includes but not limited to)

Adversarial attacks on AI/ML in Public Administration	Forensic investigation of AI-generated Audit Trails
Threat intelligence for AI-driven Public Services	Evidence integrity in AI-assisted Judicial Proceedings
Intrusion detection using ML in E-Governance platforms	Tamper detection in AI-driven Supply Chains
AI/ML Decision Support in Public Administration and E-Governance	Data Privacy, Ethics & Accountability in Public AI
Predictive analytics for Public Healthcare & Epidemic Response	Explainable AI (XAI) for transparent Public Decisions
Agentic AI Risks and Governance in Public Systems	Blockchain-backed Audit Mechanisms for AI Governance

PAPER SUBMISSION DEADLINE

15 JULY 2026

SESSION ORGANIZERS

Dr. Pooja Sarin

Assistant Professor

SOCs, UPES Dehradun, India

Dr. Pooja Sarin holds a PhD in Information Systems & Analytics from IIT Delhi, India. Her research lies at the intersection of Computational Social Science, Dark Side of Social Media, AI Governance, Big Data Analytics, Digital Behaviour, Personality Analytics and Responsible AI. Her work combines NLP, Agentic AI, machine learning, and large-scale behavioural analytics to examine emerging cyber and governance risks in digital public systems.

Dr. Rajat Goyal

Assistant Professor

CCE, UPES Dehradun, India

Dr. Rajat Goyal holds a PhD in Industrial Engineering from IIT Delhi, India. His research focuses on Digital Transformation in Public Systems, Agentic AI Governance, Supply Chain Analytics, and Operations Management. His work explores technology-enabled decision systems, intelligent governance frameworks, and AI-driven operational resilience across public and industrial ecosystems.
