SPECIAL SESSION

CYBER SECURITY & DIGITAL FORENSICS IN MULTIMEDIA PROCESSING

ABOUT THE SESSION

The rapid evolution of digital technologies, social media, and AI-generated content has significantly increased the complexity of cyber threats and digital crimes. Ensuring the authenticity, integrity, and security of multimedia data has become a critical challenge.

This special session focuses on advanced signal processing, artificial intelligence, and data-driven techniques for cyber security and multimedia forensics. It aims to bring together researchers, academicians, and industry professionals to explore innovative solutions for analyzing, detecting, and preventing cyber threats in multimedia environments.

TOPICS OF INTEREST

(INCLUDES BUT NOT LIMITED TO)

- | | |
|---|--|
| ☐ Image & Video Tampering Detection | ☐ Digital Watermarking & Content Authentication |
| ☐ Deepfake Detection & Synthetic Media Analysis | ☐ Steganography & Steganalysis |
| ☐ Audio Forensics & Voice Spoofing Detection | ☐ AI & Deep Learning for Multimedia Security |
| ☐ Multimedia Source ID & Device Fingerprinting | ☐ Adversarial Attacks & Robust Multimedia Systems |
| ☐ Secure Multimedia Transmission & Encryption | ☐ Explainable & Trustworthy AI for Forensics |
| ☐ Network Traffic Analysis & Intrusion Detection | ☐ RF Fingerprinting & Physical Layer Security |

CALL FOR PAPERS

We invite researchers and practitioners to submit original, high-quality papers to this special session.

Submissions must follow conference formatting guidelines. A dedicated track will be available on the submission portal.

- ✓ All papers will undergo a rigorous peer-review process.
- ✓ Accepted papers will be included in the conference proceedings.
- ✓ A minimum number of accepted papers is required for a successful session.
- ✓ In case of insufficient submissions, papers may be merged with relevant regular tracks.

SESSION ORGANIZERS

Prof. Arun Balodi

Dept. of Electronics & Communication Engineering
Dayananda Sagar University, Bengaluru, India

Senior Member IEEE, Fellow IETE, Life Member ISTE. Professor & Chairperson, ECE Dept. PhD from IIT Roorkee (2018). Research areas: Biomedical Signal & Image Processing, AI, Machine Learning, Pattern Recognition. 70+ papers, 9 patents. drbalodi@gmail.com

Dr. Dilip Kumar J. B. Saini

Dept. of Computer Science & Engineering (Cyber Security)
Dayananda Sagar University, Bengaluru, India

Associate Professor & Chairperson, Cybersecurity. PhD from Sathyabama Institute of Science & Technology. 55+ international publications, 5 books, 7 book chapters, 5 funded projects, 30 patents. dilipsaini@gmail.com

IMPORTANT NOTES

- All conference guidelines and policies must be strictly followed.
- A minimum number of accepted papers is required for successful conduct of the session.
- In case of insufficient submissions, papers may be merged with relevant regular tracks.
