

ICACSDF 2026 • APPROVED SPECIAL SESSION • HYBRID MODE

AI-Driven Malware Analysis and Threat Intelligence: Bridging the Gap between Research and Industrial Efficacy

Special Session at the International Conference on Advanced Computing Systems and Data Science Frontiers (ICACSDF 2026), organized by the School of Computer Science, UPES Dehradun, Uttarakhand, India.

Theme: AI + Malware Analysis + Threat Intelligence

Audience: Researchers • Academicians • Industry Professionals

Conference Website: >> www.icacsdf.org

About the Special Session

The rapid evolution of polymorphic and metamorphic malware has made traditional signature-based detection increasingly insufficient. This special session explores the convergence of Artificial Intelligence, Machine Learning, malware analysis, and actionable threat intelligence to bridge the long-standing gap between academic innovation and real-world industrial efficacy. The session invites original contributions on scalable automated detection, malware family classification, reverse engineering automation, proactive threat hunting, and deployable AI-driven cyber defense strategies for modern Security Operations Centers.

Topics of Interest

- AI-enhanced static and dynamic malware analysis
- Adversarial machine learning for malware detection
- Memory forensics and fileless malware detection
- IoT and cloud security with AI-driven approaches
- LLMs and Agentic AI for reverse engineering
- AI Assisted Threat intelligence and Threat Hunting

ICACSDF 2026

Important Dates

Please note the key deadlines for paper submission, registration, and conference participation.

Paper Submission Opens

18 March 2026

Submission Deadline

30 June 2026

Notification of Acceptance

25 July 2026

Camera Ready Submission

15 August 2026

Last Date of Registration

25 August 2026

Conference Dates

11-12 September 2026
UPES Dehradun, Uttarakhand

Session Organiser

Dr. Ashu Sharma

Cybersecurity Advisor (Manager), WatchGuard Technologies, Noida, India
Email: ashu.sharma@watchguard.com / ashu.abviltm@gmail.com
Contact: +91 8975805861

Sanjay Sharma

Senior Security and Compliance Specialist, Atari Inc.
Email: sanjay.sharma@atari.com / sanjay071288@gmail.com
Contact: +91 9616619764

Why This Session Matters

- Addresses the rise of Malware-as-a-Service and large-scale threat proliferation.
- Focuses on deployable AI methods beyond laboratory-only performance.
- Encourages collaboration between academia, SOC teams, and industry researchers.
- Supports conference tracks in cybersecurity, trustworthy systems, AI, and machine learning.

Submission & Participation

- A dedicated special session paper submission track will be made available on the conference portal.
- All submissions will undergo the standard peer-review process as per conference norms.
- Researchers, academicians, and industry professionals are encouraged to submit original work.
